M30 BEARING REBUILD GUIDE

M30 REPLACEMENT ENDURO BEARINGS

IMPORTANT : *You are required to use proper bearing installation/removal tools to pull/press these bearings into a Praxis bottom bracket. Failing to use correct tools can and will damage your new bearings and/or your BB and void your warranty.*

We highly suggest using Enduro's bearing removal/press tool kits or similar shop level bearing tool kit. Do NOT attempt to replace bearings without the correct bearing tools.

If you do not have the correct tools, please take your bike to your local bike shop for bearing replacement!

PRAXIS M30 BEARING GUIDE | M30 BEARING KIT FOR :

BSA 68-0201B | BB30/PF30 68-4001R | BB30/PF30 73-4001R
